LIFT SELECTION GUIDE

Maintenance Lift

One & two person hydraulic lifts enable safe, efficient maintenance. Leveling jacks provide stability on uneven surfaces. These models streamline operations and enhance workplace safety.

PG.6

Mini Merchandise Lift

Mini merchandise lifts offer easy-to-manuever, pushable solutions for stock picking. With a 150lb shelf capacity, they increase ergonomics & efficiency in warehouse and retail environments.

PG.6

Order Pickers

Order pickers elevate workers & shelves for efficient, ergonomic stocking. Safety features include deck rails & saloon doors, protecting workers during elevated tasks.

PG.7

Vertical Mast Lifts

Vertical mast lifts boost productivity in worksites, warehouses, & stock picking environments. These compact lifts maneuver effortlessly in confined spaces, optimizing efficiency & accessibility.

PG.8-9

Power Stockers™

Power stockers raise merchandise and workers to top shelves, enabling product to be slid on or off racks. Ideal for retail storerooms, stockrooms, and warehouses.

PG.10-11

Scissor Lifts

Scissor lifts offer drivable & pushable models for various environments & budgets. Mini versions access tight spaces, enhancing job site flexibility & efficiency.

PG.12-13

HOW TO CHOOSE SCISSOR AND OTHER LIFTS

1. Work Height vs. Deck Height

Determine the maximum working height required for your highest task. “Working height” is generally considered to be about 6 feet above the deck height. For example, if you have an 18-foot ceiling and occasionally need to change light bulbs, a scissor lift with a 12-foot deck height may suffice. However, if your tasks involve long periods of work at the 18-foot level, such as using wrenches for several hours,

this would not be ergonomically ideal. In such cases, a higher platform height is preferable, keeping the workspace between the waist and shoulders.

2. Load capacity

Evaluate the maximum weight that will need to be lifted, including both personnel and materials. Single person lifts generally have a lower weight capacity than traditional scissor lifts. If you’re considering an order picker, account for both the weight and dimensions of the products being moved.

3. Maneuverability

Consider where the lift needs to operate. Narrow aisles, tight corners, and confined spaces all require a smaller footprint and tighter turning radius. Drivable lifts offer the most flexibility, while pushable models work well in open areas where repositioning is less frequent.

4. Frequency of use

There are fully powered lifts and pushable lifts. Most are DC-powered, but some may require AC power. Pushable lifts are more affordable and a good option for infrequent use but cannot be moved while elevated. Some also use outriggers to maintain stability, although these require a larger footprint. Fully powered lifts add both power drive and steering, allowing the lift to move while elevated at any height.

5. Durability and maintenance

All lifts require regular preventive maintenance. Each lift’s manual specifies items that need to be inspected, lubricated, or serviced based on either time or usage hours. Significant parts may need to be replaced due to wear and tear, which should be done by a licensed and bonded lift service company.

6. Speed and efficiency

Fully powered lifts operate at standard speeds, but when elevated, they switch to a slower “turtle speed” for safety. Most drivable lifts automatically reduce speed when the platform is raised. Pushable lifts are more cost-effective and work well for tasks that don’t require movement while elevated. They would be inefficient for jobs that involve continuous movement at height.

MR LIFTS TELESCOPING HYDRAULIC MAINTENANCE LIFTS

• 500 LB. COMBINED TWO PERSON CAPACITY

- Working heights to 34'
- Two power options:
- Convenient plug in 120V AC
- Independent 12V DC deep cycle system with battery and charger
- Powder coated gray finish
- Complies with applicable OSHA & ANSI standards

Have You Wondered the Difference the Right Tool Makes?

ERGONOMIC EVALUATOR

Contact us for a free safety evaluation.
1-800-762-8327

Ballymore Safety Products is proud to provide ergonomic evaluation services thru our website. We use the TuMeke suite of ergonomic analysis tools to generate a MSD, Muscular Skeletal Disorder ranking from 1-10 using the REBA, Rapid Entire Body Assessment. The software also generates a NIOSH Lifting Index for the task that is being completed. When a video is provided, a Ballymore Safety Products Consultant will generate an analysis that includes REBA, NIOSH Lifting Index, and a video output with body links highlighted in Red, Yellow, Green indicating the risk level throughout the task.

Ballymore lifting / lowering solutions will be presented along with a predicted reduction in the back injury rate.

The predicted Back Injury Rate Reduction is based on a study performed by Marras from the Ohio State

University Biodynamics Lab. The study involved 353 industrial jobs. The NIOSH lifting index was calculated for the 353 tasks and injury rates were tracked over a 6 year timeframe. A correlation between the NIOSH Lifting Index and injury rates was defined.

Submit a form and upload a video of the task that needs evaluating.

FREE EVALUATION!

With the addition of Certified Safety Professionals to our staff, we are happy to offer assistance with problem solving related to safety issues that are resulting in back injuries for our customers. We have the ability to help safety professionals quantify the difference an intervention will make in terms of the reduction in the rate of back injuries related to a specific task.

PAUL GILKINSON | CERTIFIED SAFETY PROFESSIONAL

Paul is a seasoned safety professional that has worked with a broad range of companies from Fortune 100 companies to locally owned family businesses over the last 30+ years. He has depth of experience in helping companies reduce the risk of severe injuries in the workplace. His past consulting work includes Retail, Manufacturing, Transportation, Construction, and Distribution Centers.

ZACK MOYA | CERTIFIED SAFETY PROFESSIONAL

Zack Moya is a new addition to Ballymore, who arrives with a storied history in Environmental Health & Safety. With over 12+ years, he has worked with a broad range of companies within the Fortune 100 across various industries including but not limited to: Warehousing, Transportation, Retail, Construction & Energy.

Product Specifications are subject to change without notice. Please confirm critical product specifications at the time of ordering.

Inspection Procedure

Shipments are made FOB factory. Each product has been inspected before shipment. Consignee is responsible to inspect product at time of delivery and should refuse shipment or provide written notice to carrier upon receipt of damaged products.

Carriers and Ballymore will not accept claims if damage is not noted at the time of delivery.

Freight: Ship Prepaid and Add to take advantage of freight cost reductions with our carrier. Service Charge will be added Ballymore can provide estimated freight cost based upon our preferred carriers. Note: Cost are subject to change depending on fuel surcharges, special delivery requirements, etc. Ballymore will not be responsible for differences in freight estimates and actual freight costs.

On collect or 3rd party billing shipments, any freight claims must be handled by the customer, including refused shipments.

WARRANTY (ALL PRODUCTS INCLUDING LIFTS):

- A. Seller warrants goods manufactured by it to be from defects in material and workmanship for one (1) year following the date of shipment.
- B. Products, or component parts which may be sold by Seller but which are not manufactured by the Seller are not warranted by the Seller, but are sold only with the warranties, if any, of the manufacturers thereof
- C. Any warranty claim by the Buyer must be in writing, containing full and submitted to Seller within 15 days of when the cause of the claim first came to the Buyer's attention. The relevant product must be held intact by the Buyer to be available for inspection by Seller's staff, agents or representatives.
- D. All product returns require a return authorization prior to shipping (RMA). Returns related to a warranty claim will be accepted on the condition that should Seller, in its reasonable opinion, reject the claim, all costs directly incurred by Seller (including the cost of transport to and from the premises of Seller and inspection) will be paid by the Buyer.
- E. The decision to repair or replace any parts of the product will be made by Seller based on which approach will provide the Buyer with the best service.
- F. The liability of Seller for a breach of any express warranty in these terms and conditions, or breach of an implied warranty, condition or representations required by law to be provided, if any, is limited to (the choice of which is at the discretion of Seller). In the case of product:
 - i. replace the product or provide similar product; or
 - ii. repair the product; or
 - iii. pay to the Buyer the reasonable cost of replacing the product or acquiring an equivalent product; or
 - iv. pay the Buyer the reasonable cost of having product repaired; or
 - v. accept return of the product and refund the purchase price;
- G. To the full extent permitted by law, Seller shall not be held liable for any defects in the product which are the result of:
 - a. improper use or mismanagement of the product by the Buyer;
 - b. operation other than in accordance with the Seller's operating manual or official user supplements and bulletins supplied by Seller;
 - c. use of the product in a manner which is not reasonably contemplated by Seller;
 - d. use of the product with parts which have not been approved for use by Seller;
 - e. modification of the product in a manner not authorized by Seller;
 - f. subjection of the product to unusual or non-recommended conditions, physical, environmental or electrical stress;
 - g. reinstallation or moving of the product by a person other than Seller or a 3rd party approved by Seller;
 - h. the Buyer's failure to comply with any of these terms and conditions; or
 - i. the failure or refusal to install engineering changes or enhancements to the product recommended by Seller.
- H. Notwithstanding any other provision of these terms and conditions, to the full extent permitted by law. Seller shall not be liable to the Buyer for any indirect, consequential, incidental, punitive or special loss (including, without limitation, loss of profits, business, interest or anticipated savings) howsoever arising and whether caused by the negligence of Seller, its employees, agents and/or contractors.
- I. This warranty does not cover labor or other costs or expenses to remove or install any defective, repaired or replaced goods.

RETURN POLICY:

If for any reason Buyer is not satisfied with any standard product received from Seller, Buyer must advise Seller within 15 days of receipt of your order. All items to be returned must be authorized and assigned an RMA number by Seller. We will not accept any returns without a Seller issued RMA number. All returns must be in good condition, in the original packaging (or reasonable substitute) and prepaid within a 15-day period of RMA issue. A 20% -25% re-stocking fee will be applied to all standard items including lifts; 50% on aluminum and stainless. All modified items are non-returnable.

NON-REFUNDABLE ITEMS:

Custom or modified ladders, work platforms, crossovers, modified or custom lifts are non-refundable.

MINIMUM ORDER: \$15.00. Prepay and add shipments are subject to a service charge.
