

PLD-PLUS

1,500 lb Weight Capacity

Ballymore's most recent innovation is our powered Portable Loading Dock. This patent pending product is powered in both forward and reverse directions, plus the platform can be hydraulically raised from ground level to 55" high. The Portable Loading Dock PLUS is heavy duty, with a capacity of 1,500 lbs. It is ideal for loading or unloading heavy objects to dock levels or pickup truck bed heights. No more back breaking lifting or trying to balance expensive objects on a fork lift, the powered Portable Loading Dock will make any loading job safe and easy to complete.

MODEL #

PLD-PLUS
