WHY BALLYQ?

STOP REACTING. START PREVENTING.

Every day, equipment runs without oversight. Operators bypass safety protocols. Damaged machines stay in service. And when something goes wrong, you're scrambling for answers that should have been in front of you all along.

BallyQ is the Safety Intelligence Platform that changes that — giving facilities managers, operations teams, and safety officers complete visibility into every piece of motorized equipment, in real time.

MULTI-DEVICE PLATFORM FACILITY OVERVIEW. CYCLE COUNTS. MACHINE VIEW

FIVE MODULES. ONE IQ SCORE FOR EVERY ASSET.

OPERATIONS IQ

EVERYTHING YOU NEED. NOTHING YOU DON'T.

One platform. Every machine. Complete intelligence from sensor to dashboard.

REAL-TIME MONITORING

Current and pressure sensors capture cycle counts, runtime hours, and operational data for every machine — delivering a live birds-eye view of your entire facility from a single dashboard.

ACCESS CONTROL

Centrally managed credentials. Provision access by training certification or manager approval. Every access event logged and auditable.

EQUIPMENT INTELLIGENCE

Detailed time history, operator input tracking, and motion data. Retrieve forensics for safety events. Analyze usage patterns. Track intermittent fault conditions before they become failures.

PREVENTATIVE MAINTENANCE

Analyzing historical service records alongside live telemetry to prevent failures before they happen. The future of fleet maintenance — transforming your strategy from reactive to proactive.

INDOOR POSITIONING

Know where every asset is — even inside 100,000 sq ft facilities where GPS fails. Real-time location for every machine in your facility, without relying on cellular or satellite signals.

CANBUS INTEGRATION

Deep equipment telemetry through direct CANbus integration — enhancing monitoring beyond basic sensors. First targets: PSL and Noblift Rebel, expanding across your fleet.

SUPPORTED EQUIPMENT

BUILT FOR THE MACHINES THAT RUN YOUR BUSINESS

BallyQ integrates with the motorized equipment that powers large-format retail, warehousing, and industrial operations.

DISTRIBUTION CENTERS

EQUIPMENT RENTAL

WAREHOUSE OPERATIONS

LARGE-FORMAT RETAIL

INDUSTRIAL FACILITIES

HOME IMPROVEMENT

BRAND-AGNOSTIC MONITORING

BallyQ isn't just for Ballymore. Our platform integrates with any powered asset in your facility—regardless of the manufacturer—giving you a single, universal view of your entire fleet's safety and performance.

SEAMLESS WMS INTEGRATION

BallyQ integrates with SmartRack motorized storage systems to provide real time equipment monitoring, operational insights, and seamless connection with warehouse management software (WMS).

FOUR PRODUCTS. ONE ECOSYSTEM.

Every BallyQ product runs on the same IoT device, the same dashboard, and the same intelligence layer — deployed in under two hours on any motorized or mobile asset.

HUB

Dashboard + Analytics – the foundation of every BallyQ deployment

- ✓ **BallyQ Analytics** **Included**
- ✓ Facility overview dashboard
- ✓ Cycle counts + meter readings
- ✓ Machine view + asset history
- ✓ Multi-location intelligence

* IOT DEVICE - WIFI OR CELLULAR

FLEET

Any motorized or mobile asset – forklifts, carts, lifts, platforms, and more

- ✓ **BallyQ Analytics** **Included**
- + + *BallyQ Protect*
- + + *BallyQ Prevent*
- + + *BallyQ Locator***

* IOT DEVICE - WIFI OR CELLULAR

RACK

Mobile aisle intelligence with WMS integration and pick-to-light automation

- ✓ **BallyQ Analytics** **Included**
- + + *BallyQ Protect*
- + + *BallyQ Prevent*
- + + *BallyQ Sync*

* IOT DEVICE - WIFI OR CELLULAR

INSPECT

Inspection checklists and repair dispatch –no hardware required to start

- ✓ Inspection Checklist
- ✓ Repair dispatch + logging
- ✓ Complete audit trail
- ✓ No hardware required

SOFTWARE ONLY –DEPLOY IN MINUTES

* Additional expense for cellular hardware

** Additional expense for hardware beacons

DOC TECHNICIANS ENSURE

- Precise system installation
- Retrofit of existing racking and shelving
- Code compliant setup
- Ongoing inspection and preventative maintenance
- Responsive service and repair support
