

BMML-9

Mini Merchandise Lift

The BMML-9 is mini merchandise lift, designed to operate in tight aisle ways. It has a heavy duty shelf that is perfect for stocking and de-stocking product. The BMML-9 will increase productivity and enhance safety, as an employee can load multiple boxes on the shelf rather than going up & down on a ladder. The lift is equipped with a safety limit switch which prohibits it from rising without the floor locks firmly on the floor. The Mini Merchandise Lift is easy to maneuver as it comes with two swivel casters and two rigid casters. The BMML-9 is battery operated, and can be charged using a standard 110 volt outlet. The lift also comes with a manual lowering valve, power cut-off switches and simple controls.

Footprint only 26"W X 53"L

Great for tight aisle ways!

• 500 LB. CAPACITY

- Merchandise Shelf = 25" Wide X 17" Long
