BALLYQ

SAFETY INTELLIGENCE PLATFORM

Key Features

Precision Tracking:

- Track inspections and maintenance.
- Access control to monitor and limit equipment usage.
- Safety Alerts from equipment faults or improper usage.

Equipment Intelligence:

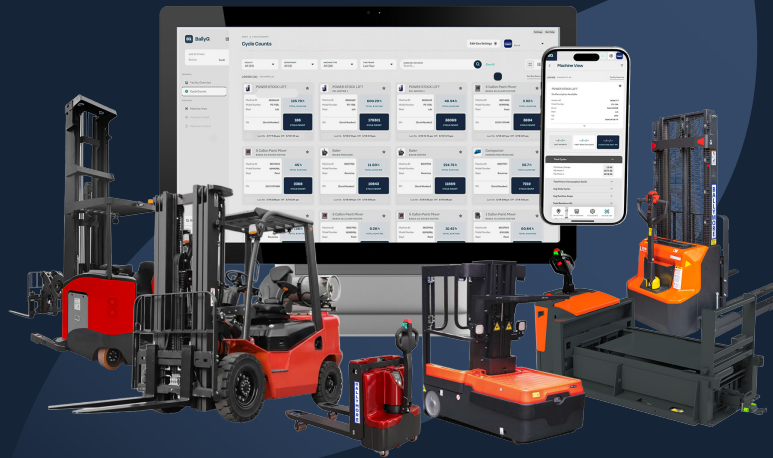

- Know what machines are down and where.
- Identify trends to ensure reliability and longevity with proactive maintenance.

Safety & Compliance:

- Every access event logged and auditable through centrally managed credentials
- Instant alerts from equipment faults or improper usage before they become failures

Data & Analytics:

- Accurate, real-time insight from all equipment across a nationwide fleet.
- Robust data analytics empowers operational efficiency

Brand-Agnostic Monitoring

BallyQ isn't just for Ballymore. Our platform integrates with any powered asset in your facility, regardless of the manufacturer, giving you a single, universal view of your entire fleet's safety and performance.

Decommissioning

Turnkey Solutions

Custom Engineered Access

Custom Service & Prevention Maintenance

Comprehensive service, equipment, and facility solutions

SINGLE SOURCE OWNERSHIP
Eliminate Vendor Gaps

One contact for all service & preventative maintenance of equipment, eliminating gaps caused by fragmented vendor oversight.

FULL ASSET MANAGEMENT
Track Every Asset

Complete tracking of make, model, serial number, and repair spend to support crucial capital decisions and rapid expansion.

HIGH-LEVEL SERVICE INTEGRATION
DOC Owns the PM Layer

Critical infrastructure stays in-house. DOC owns PM and facility upkeep through regularly scheduled monthly visits.

THE RACK LIFECYCLE - EQUIPMENT AT EVERY STEP

01

Shipping & Receiving

Dock levelers, pallet jacks, stackers, drum handlers, carts

02

Staging & Development

Workstations, mobile carts, short-term hold shelving

03

Build & Integration

ESD workstations, assembly benches, component shelving

04

Server Floor / White Space

Server & rack lifts, narrow-aisle carts

05

Parts & Spares Room

Industrial shelving, bin systems, secure cabinets, parts carts, BallyQ / keypad / key

06

Maintenance & Repair

Workbenches, tool storage, parts, shelving, drum handlers

07

Decommissioning & E-Waste

Secure carts, chain of custody

SCALABILITY & EFFICIENCY
Grows With Your Facility

Modular service offerings expand quickly with facility growth and a predictable cost structure.

SAFETY & COMPLIANCE
OSHA & ESD Compliant By Default

Full OSHA and ESD compliance baked into every program, with proactive equipment reporting to prevent downtime or violations before they occur.

WHAT OPERATORS GAIN

Uptime

PROTECT LIVE EQUIPMENT

A populated rack never gets muscled into place next to live gear, so a routine job does not become an incident.

SERVER & RACK LIFT

Speed to Deployment

COMPRESS THE SCHEDULE

An existing lift fits most racks with little to no modification, and we ship fast, so capacity moves now.

EXISTING LIFT + FAST SHIP

Safety

PERSONNEL AND EQUIPMENT

AI servers now run past 300 lbs. Powered lifts, pallets jacks, and stackers take that load off people's hands.

POWERED LIFTS, JACKS & STACKERS

Security

CONTROL WHO OPERATES

Access control built into the equipment: BallyQ, keypad entry, and physical key locks, depending on the device.

BALLYQ, KEYPAD & KEY LOCKS

Productivity

DO MORE WITH FEWER HANDS

Powered equipment lets one worker move and place loads that used to take a crew, so the same team does more per shift.

POWERED JACKS, STACKERS & TUGGERS

Customization

BUILT TO YOUR NEED

When a standard unit does not fit the application, we engineer and manufacture a turnkey solution.

IN-HOUSE ENGINEERING & TURNKEY

WHY BALLYMORE?

No other single partner covers this much of the data center operation

Custom Engineered Solutions
Turnkey solutions for application-specific challenges

Nationwide Service
Installation, maintenance, and repair in all 50 states

BallyQ IoT Intelligence
Access control, equipment tracking, safety alerts

One Partner. Six Brands.
Complete coverage of your workflow
