EQUIPTO SMARTRACK

Key Benefits

Maximize Storage & Floor Space

Expands usable floor space

40-60%

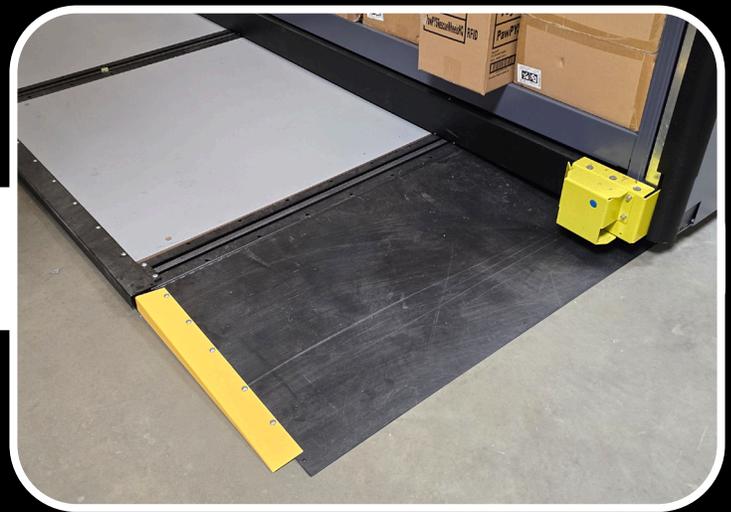

Motorized System

SmartRack delivers push button motorized access, with manual capability available for flexibility and power outages. Intelligence by BallyQ.

Raised Tracking System

Raised platform to avoid cutting into the ground during install

Retrofit Ready Design

Transforms your current racking into a motorized high density solution with minimal disruption and no need for full system replacement.

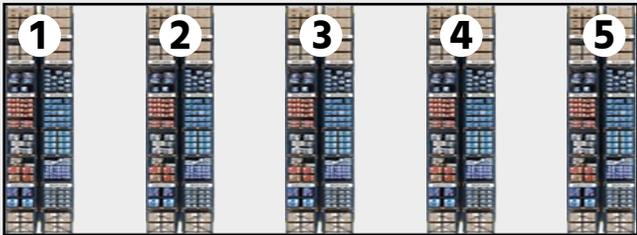

TURNKEY SYSTEM

Survey. Configure. Design. Install.

Equipto SmartRack is a motorized mobile racking system built to dramatically increase storage capacity while keeping inventory safe, organized, and easy to access.

It can be configured for **light to medium duty shelving** applications and installed as part of a new layout or used to retrofit your existing shelving into a high density system without sacrificing usability.

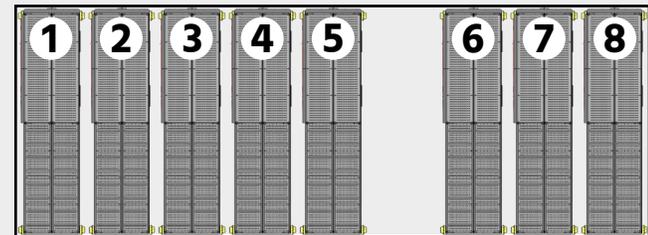

Reclaim Space Or Increase Capacity

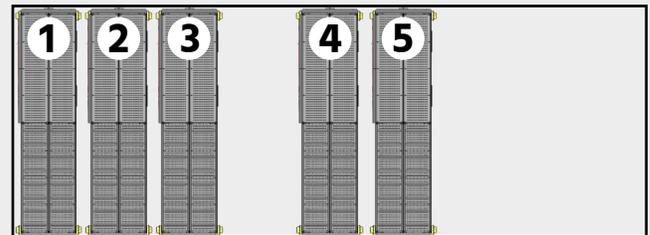

Reduce unnecessary aisles, increase storage density, and unlock up to 40 to 60 percent more usable floor area.

UNLIMITED OPTIONS

Built Around Your Operation

Configurable Options:

- Equipto Shelving Systems
- Integrated Drawer Cabinets
- Built-in Workbenches
- Hanger Bars
- Custom Widths and Depths

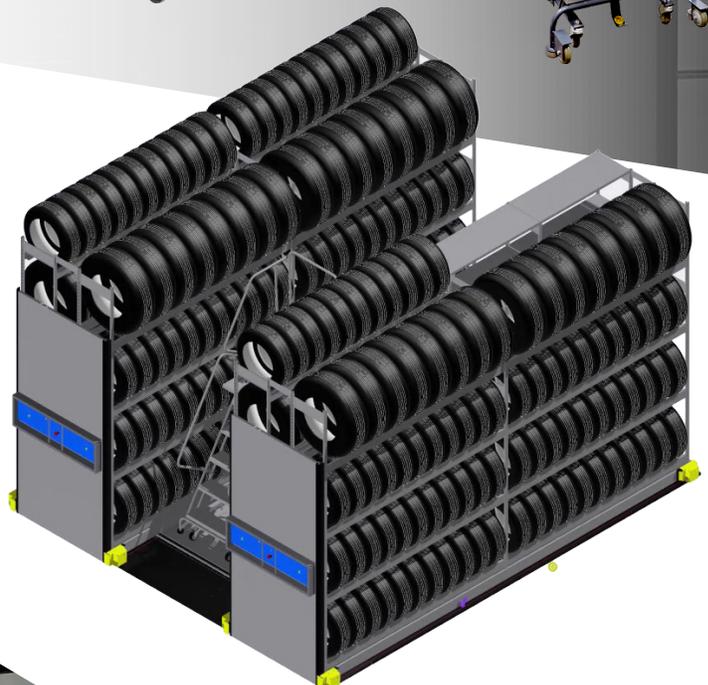

Related Products:

- Rolling Safety Ladders
- Stock Picking Carts
- Security Carts
- Foldable Hybrid Ladder & Docking Station

SmartRack Tire System

Purpose built high density tire storage engineered for automotive, fleet, and service environments.

Safety Built Into Every System

SmartRack is engineered for long term stability, operator confidence, and code compliance.

Safety Features

Stable Tracking System

Heavy duty guided tracking ensures smooth, controlled carriage movement.

Anti Tip Protection

Integrated anti tip design supports seismic compliance and prevents system instability.

Raised Platform Track Design

Surface mounted track eliminates the need to cut into your floor, simplifying installation and protecting facility infrastructure.

Enclosed Drive System

All moving drive components are fully enclosed to reduce exposure to rotating parts and internal mechanisms.

Aisle Obstruction Protection

Integrated sweep system detects obstructions and stops movement to help protect personnel and inventory.

Anti Pinch Point Protection

Reduced side rail profile helps minimize pinch point exposure along the carriage edge.

EQUIPTO SMARTRACK

BallyQ Safety Intelligence Platform

Precision Tracking:

- Track inspections and maintenance.
- Access control to monitor and limit equipment usage.
- Safety Alerts from equipment faults or improper usage.

Equipment Intelligence:

- Know what machines are down and where.
- Identify trends to ensure reliability and longevity with proactive maintenance.

Data & Analytics:

- Accurate, real-time insight from all equipment across a nationwide fleet.
- Robust data analytics empowers operational efficiency

Safety & Compliance:

- Track inspections and maintenance.
- Access control to monitor and limit equipment usage.
- Safety Alerts from equipment faults or improper usage.
